This establishment has been doing business for more than thirty years with no change whatever in ownership or management.

JOSSELYN GOOSEBERRY.

A Magnificent Success. It Has No Rival.

Best grower, best foliage and most profitable fruiter, when compared with any other Gooseberry in existence. The freest of all Gooseberries from mildew, both in leaf and fruit.

If you have not the Josselyn you may be sure you have not the best Gooseberry.

The Rochester Lithographing Company of Rochester, N. Y., have lately issued very nice Plates of the Josselyn Gooseberry and are now ready to supply these Plates to Nurserymen.

The Red Jacket Gooseberry is an English variety of little or no value. We do not offer it.

THE SAN JOSE SCALE.

We have never had this pest on our grounds or premises. From the first we believed the best thing we could do with this Scale was to keep it out and we have in this been successful, thanks to the able, efficient and faithful assistance we have received from the gentlemen of our New York State Department of Agriculture who have had charge of these matters.

CERTIFICATE OF INSPECTION.

Every consignment from us will be accompanied by a Certificate from our proper State Authorities stating it is free from all contagious disease or diseases or the San Jose Scale or other dangerously injurious pest or pests.

We now grow all our Grape Vines entirely out of doors from cuttings about 7½ to 12 inches long. Many years of experience have demonstrated to us that Grape Vines grown from short cuttings or partly grown in green-house are not as valuable for vineyard or garden as from long cuttings all grown in open air.

CAMPBELL'S EARLY GRAPE.

Planters of this Grape will find herein some very important information on this subject.

Campbell's Early vines are now being bought in large lots by careful, wide-awake vineyardists who want a grape which will hang on the vines, will not crack and which will keep and can be marketed at advantageous times instead of having to be forced on the market on some special day to avoid cracking and shelling. These vineyardists want a grape which will bring profitable returns instead of possible losses and which will fill the bill for people who are able and willing to pay a better price for something better in quality than the common kinds of grapes. As more than one-third of the people do not and will not swallow grape seeds, here is another gap which Campbell's Early fills. The fruit of Campbell's Early in our own vineyard has hung on the vines sound and perfect for more than **ten** weeks after ripening, which fact was observed by numerous vineyardists in our neighborhood. As a good keeper and shipper it is believed to be unequalled by any other grape. Its early ripening is at same time with Moore's Early and at that time the quality of Campbell's Early is fully as good as Moore's Early. After that time the quality of Campbell's Early steadily improves for from two to six weeks, so its season is not only very early but is also medium and late. In short, you can pick them from early to late as you choose. It is the best keeper in our entire collection. We have never known a bud of Campbell's Early to be hurt by frost; in our own vineyard they have stood 18 degrees below zero without any injury. Campbell's Early is inclined to overbear, so when this occurs the blossoms (or fruit when small) should be thinned or the vines and fruit will probably suffer in following year.

We believe the usual practice of pruning Campbell's Early is to leave too much wood. On old vines we leave only 3 to 4 canes, each 12 to 18 inches long. We use three wires respectively 24 inches, 36 inches and 60 inches from the ground. We train from lower wire, tie to second wire and later in season tie new shoots to top wire.

The real value of a new grape which has been on the market for ten or a dozen years is quite accurately shown by the demand for such variety for vineyard planting.

We will furnish without charge one colored plate for each plate book, on condition that those who receive these plates buy their stock of Campbell's Early of us while using our plates.

TERMS AND PARTICULARS.

We grow the largest stock of grape vines in America and offer them graded to our own high standard.

References—Dun's or Bradstreet's Commercial Registers, Third National Bank, Buffalo, or any Bank in Fredonia or vicinity.

Our vines are warranted true to name, and of grades represented.

Should any stock not prove true to name, we will either refund the purchase money of same, or replace with stock true to name free, but will not be liable for further damages, and while we are exercising great care to avoid mixtures, the above is to be a condition on which all stock is delivered.

All packing will be done neatly and with strict regard to the interest of the customer. Should any error occur, claim must be made immediately upon receipt of goods by customer. We agree to pack only according to our own methods of packing which methods vary as seasons change. If those who ship stock to us will pack according to our methods we will be entirely satisfied. After our stock leaves our care and control we will not be responsible for any damage to stock caused by heat or frost or any other cause whatsoever.

All orders are to be without liability to us should injury or misfortune befall the stock from hail, frost, fire or any other cause beyond our control. All stock journeys at the risk and expense of the purchaser.

Purchasers will please give shipping directions always. In case no such directions are sent with orders we will use our best judgment in the matter.

Terms Cash:—Bankable notes for 30 to 60 days will be accepted from customers of satisfactory record or bank reference.

Fall accounts are due before December 1st, when we draw at sight for any amounts due. Interest charged on all bills overdue.

For vines shipped after November 1st for Spring trade we will accept bankable note due June 1st without interest.

All express or freight charges on goods or money must be paid by the customer. If goods are shipped C. O. D., at least one-fourth the amount of the bill must be sent with the order.

We will send to nurserymen or large planters samples of vines at 100 rates with 5 cents postage on three one year vines, and 10 cents postage on three two year vines. We cannot do justice in samples unless we send three of each kind and grade wanted.

We commence Fall packing about October 1st. No charge for boxing or packing.

After we have booked orders for stock and have held it against all comers, we shall positively decline to cancel any part of such orders when it is to our disadvantage to do so.

SPECIAL NOTICE.

The term "Fredonia Grown" as applied to nursery stock has not the meaning of years gone by. As a matter of fact, the land in Fredonia and vicinity which has heretofore been used for the growing of Grape Vines, etc., is now nearly all practically worn out for these purposes; so much so, that, although we have exercised greatest care in planting and cultivating, we have not been getting the results we needed. As I size it up, to get a certain number of first-class plants, we have been resetting about double the number of plants and planting about twice as many acres as we would have needed if the land had been in proper condition. Lately it has been up to us to get some suitable land or quit the business and we have been fortunate in buying a tract of land of 172 acres which has been considered the best large farm in our County. It is situated nine and one-half miles from our office and cellars. We couldn't help that because it is just the kind of soil we need for Grape Vines, Currants and Gooseberries and such land is not to be had nearer home. It was not practical to draw our men, stock, etc., with horses the above distance so we have partly annihilated the journey by purchase of a three and one-half ton auto truck which, at moderate speed, makes the run within the hour. We are sparing no needed expense in fertilizing and care to put and keep this farm in prime condition so it will be known as it has been, as the "best farm in the County" and we feel sure that when we get results from our work and expense we shall grow first-class stock cheaper.
